

**JET HOSE SPOOLER WITH 8" THERMOID HOSE & 4" AIR HOSE**

Water Suction / Discharge	-	8" Hammer Union
Air Suction / Discharge	-	4" Hammer Union
Dimensions	-	5500 x 4000 x 4200mm x 12 MT
No of Units	-	1

**Jet Hose Spooler Unit**

The hydraulically powered hose spoolers are an important part of the jetting spread as it houses the 8" water supply hose (fed from the jet pump) & 4" air-hose, configured in a chiksan such that the water/air supply are continuous as the spooler reels out the hoses. The water supply hose is of high strength anti-kink type where it is durable and prevents kinking/collapse during operation.
