

# WIRE SPOOLER

OCS owns different types of spoolers specified for various kinds of job scope. This particular wire Spooler is utilised for our pipe pull scope. The reels are interchangeable and can be replaced on site.

This spooler is driven via a Hanggluns motor and powered by our Deutz 913 diesel engine power pack.

All our spoolers have been designed, engineered, manufactured and tested by our own OCS team and as the saying goes, We are a one stop shop.

## WIRE SPOOLER SPECIFICATIONS

|                                     |            |
